About

Full Stack Developer with 5+ years of rich professional experience of building and delivering highly scalable, enterprise grade software products. I hold a Bachelor's degree in Computer Sciences from the Punjab University College of Information Technology, Lahore, Pakistan

Experience

Agoda

December 2021 - Present

Full Stack Software Engineer

Leading several teams, working on solutions based upon distributed computing to make the e-commerce scene under the global travel space alive

Working with teams to migrate long-running legacy systems to a newer and a better stack
Keeping track of the learning abilities of my team so that they can progress in their respective careers and interests

Having 1:1s to shape up the team culture and align them with essential matters at the organization

Build a mindset and culture of quality first; Owning our stuff and converting them to quality artefacts and systems

Help the organization envision what moving away from legacy could mean and preach the benefits within the team(s)

Help the team understand Agility at work and take them through ceremonies; This helps the team give their best following sprints

Making an effort around organizational values, so it lives within the team and work we do.

Strategic System International

November 2019 - December 2021

Senior Software Engineer

Design and developed multiple major modules and provide technical support to web application as well mobile application. My responsibilities include:

Building micro services oriented systems that enable integration with various external systems.

Working in an agile, scrum environment using .NET stack to design and build highly optimized solutions to be deployed at a global scale.

Optimizing and refactoring existing modules to accommodate new functionality and enhance performance and maintainability.

Design and develop timesheets management module based on types of systems. User can track workings hours and working experience with different clients. User can upload paper timesheets as well.

Implementation of Elastic search to enhance the performance and visualize the data.

Provide technical to mobile application

Provide technical support and consultancy to other projects as well

CureMD

September 2017 - November 2019

Software Engineer

Developed multiple major projects, as a full stack .NET developer as well as a software architect. My responsibilities include:

Building highly scalable and robust, service-oriented systems that enable integration of our flagship product with various external information exchange partners.

Working in an agile, scrum environment using .NET stack to design and build highly optimized solutions to be deployed at a global scale.

Providing technical and client support to various deployed products. Co-ordinate and plan inter and intra team activities.

Restructure and refactor modules of existing products to accommodate new functionality and enhance performance and maintainability.

Logix Infinity

June 2016 - September 2017

Software Engineer

Worked as a software developer, specializing in web and desktop application development, mainly using the .NET stack along with other web technologies (Angular, Ionic and JavaScript). It gave me a chance to work on an array of diverse projects, offering me a great learning experience and exposure. I've developed web-based software using ASP.NET (MVC, WEB API, .NetCore), Angular/Ionic and SQLServer.

Education

FAST - NUCES

2006 - 2010

Bachelor

“ Amir is surely missed by his team/peers and I think any company would find great benefit with the addition of Amir to their leadership and technical team. Wish you all the best Amir and hope our paths cross again. ”

Heinrich Rust

“ As a colleague Amir is friendly, personable, has an easy manner and great sense of humour. A clear communicator with a voice for radio, Amir is wise head on young shoulders. ”

Paul Fitzgerald
