layman conversions 1:1s

- organization
- Build a mindset and culture of quality first; Owning our stuff and converting them to quality artefacts and systems
- Help the organization envision what moving away from legacy could mean and preach the benefits within the team(s)
- Help the team understand Agility at work and take them through ceremonies; This helps the team give their best following sprints
- Making an effort around organizational values, so it lives within the team and work we do.

SENIOR SOFTWARE ENGINEER

Strategic System International | Nov 2019 - Dec 2021 (2 years 1 month)

Design and developed multiple major modules and provide technical support to web application as well mobile application. My responsibilities include:

- Building micro services oriented systems that enable integration with various external systems.
- Working in an agile, scrum environment using .NET stack to design and build highly optimized solutions to be deployed at a global scale.
- Optimizing and refactoring existing modules to accommodate new functionality and enhance performance and maintainability.
- Design and develop timesheets management module based on types of systems. User can track workings hours and working experience with different clients. User can upload paper timesheets as well.
- Implementation of Elastic search to enhance the performance and visualize the data.
- Provide technical to mobile application
- Provide technical support and consultancy to other projects as well

SOFTWARE ENGINEER

CureMD | Sep 2017 - Nov 2019 (2 years 2 months)

Developed multiple major projects, as a full stack .NET developer as well as a software architect. My responsibilities include:

- Building highly scalable and robust, service-oriented systems that enable integration of our

flagship product with various external information exchange partners.

- *Working in an agile, scrum environment using .NET stack to design and build highly optimized solutions to be deployed at a global scale.*
- *Providing technical and client support to various deployed products. Co-ordinate and plan inter and intra team activities.*
- *Restructure and refactor modules of existing products to accommodate new functionality and enhance performance and maintainability.*

SOFTWARE ENGINEER

Logix Infinity | Jun 2016 - Sep 2017 (1 year 3 months)

Worked as a software developer, specializing in web and desktop application development, mainly using the .NET stack along with other web technologies (Angular, Ionic and JavaScript). It gave me a chance to work on an array of diverse projects, offering me a great learning experience and exposure. I've developed web-based software using ASP.NET (MVC, WEB API, .NetCore), Angular/Ionic and SQLServer.

A W A R D S

- **IASA IT Architecture Core (ITAC) – CITAF Certification** | May 2015 | Iasa Global
Anchors to the beginning of Architect position and responsibilities
- **Won the GIKI SOFTCOM 08 (Programming Competition)** | Apr 2008 | GIKI University Pakistan
A speed programming competition of national level

REFERENCES

Amir is surely missed by his team/peers and I think any company would find great benefit with the addition of Amir to their leadership and technical team. Wish you all the best Amir and hope our paths cross again.

— Heinrich Rust

As a colleague Amir is friendly, personable, has an easy manner and great sense of humour. A clear communicator with a voice for radio, Amir is wise head on young shoulders.

— Paul Fitzgerald
